

Cities of the Damned

Combined Addenda as of Sep. 1, 2024

Before You Begin:

The counters for both games are set very firmly in their trees. Great for surviving being shipped, but possibly hard to punch out. Best to use scissors and just cut them out.

Aachen

The Rules

Case 6.3.1 (discrepancy): The rule for units returning into play from the Out of Action Box differ between the rulebook text vs. the PAC on the back page. The rulebook should be treated as authoritative. Optionally, if you want to use what's on the PAC to grant more flexibility, try it as a house rule.

Cassino

The Rules

Module 7.0 Counter-Attacks (correction): In the first sentence, move the word "VP" from behind "Allied-controlled" to behind "German-controlled". (Note: The example of play is correct on this point and this change will align the rule with the example.)

The Counters

The reverse side of the AP Marker should have "10" printed on it. You can ink it in or just flip it over on the track if you accumulate 10 APs.
