

# ROME, INC.

Addenda as of May 1, 2021

## The Rules:

**6.2.4 Example (correction):** The counter image and text for Statesman Tiberius should show and state an Illyrian War special ability instead of a Pannonian War.

**10.7.5 (addition):** If a Fleet in a Province in Syria with a Sun icon is forced to Transfer due to a Revolt, and there is no Roman or Insurgent Province in Syria with a Sun icon, it is Dismissed and placed in the Barracks Box (Section 11.3).

## The Scenarios:

**General Play Note:** While Legions, Auxilia, etc. are limited to what the scenario gives you (same with Wars), a player may create extra Insurgent, Veteran Allied, Allied, and Barbarian counters if needed.

**14.0 (correction):** Pay should be 80, not 79.

**17.0 (correction):** Pay should be 276, not 273.

## The PACs:

Due to a printing mishap, on page 2 of the PACs there are some game tables with blank cells. Download the correct version of the page by clicking this link:

<http://www.atomagazine.com/extras/53PACsample.pdf>

## The Counters:

**Tiberius (correction):** This Statesman's counter should have an Illyrian War instead of a Pannonian War special ability (the nomenclature was changed on the map and war counter, but not for him). Use this replacement image below to update your piece.
